

Improve Customer Service with Real-Time Access to Available Inventory, Inventory-In-Transit, and Inventory Costs

Control system-wide inventory to manage your distribution process efficiently and without losing track of costs. Receive inventory to a specific location and drill down to change item default lot/serial numbers, valuation methods, accounts, and more.

INVENTORY MANAGEMENT FOR THE WAY YOU DO BUSINESS

- **Multiple Warehouses.** Manage multiple warehouses with location-specific inventory quantities, allocations, and costs. Redistribute inventory from a central warehouse to other warehouses automatically upon receipt. Assign specific access rights for each warehouse to determine who can access information and enter transactions.
- **Multiple Valuation Methods.** Use standard cost, moving average, FIFO, and item-specific methods. Select a different valuation method for each inventory item. Make direct adjustments to cost and physical inventory count using report and inquiry screens.
- **Lot and Serial Numbering.** Track inventory by lot or serial number. Assign or enter lot/serial numbers on receive, issue, or assembly. Associate item-specific valuation methods to serial numbers to track specific costs.

Gain real-time insights into inventory levels linked with accounting.

KEY BENEFITS

GET SECURE ACCESS FROM ANYWHERE

- View, modify, and analyze inventory using any popular web browser
- Restrict access to inventory by item or warehouse

IMPROVE CUSTOMER SATISFACTION

- Honor contracts and fulfill orders as promised with real-time access to inventory levels and customer-specific pricing

MANAGE COSTS

- Accurately track costs of goods sold and inventory holding costs
- Create general ledger entries directly from inventory transactions

SPEED UP DATA ENTRY, MINIMIZE ERRORS

- Save time entering data with inventory sub-items and flexible screen layouts
- Reduce errors by setting default accounts, subaccounts, valuation methods, lot and serial numbers, storage locations, and sub-item values

ACCELERATE DECISION- MAKING

- Use drill-down reports and dashboards to gain access to past information and provide insights into future needs

INVENTORY MANAGEMENT FEATURES AND CAPABILITIES

Expiration Dates	Deduct expired items from your list of available inventory by assigning an expiration date for each lot and serial number. Acumatica can automatically issue items with the earliest expiration date to minimize losses.
Transaction Reason Codes	Measure trends and spot problems by assigning reason codes to inventory transactions. Reason codes can be linked to both general ledger (GL) accounts and inventory levels for financial and operational reporting.
Two-Step Transfers	Inventory transfers are performed in two steps so you can track goods in transit between locations with GL entries into and out of "in transit" accounts.
Inventory Bin/Location Control	Specify the types of items and transactions allowed, picking priority, and cost by bin and location.
Purchase Order Automation	Automatically generate purchase orders based on stock level and replenishment algorithms. Orders go to the vendor with the best price and delivery time.
Sales Order Discounts and Promotions	Manage complex pricing and discount policies, including volume discounts and multiple discounts per item. Maintain policies for price overrides.
CRM Integration	Convert CRM opportunities to sales orders without re-entering pricing and discount information. Customer service can locate orders to verify shipping and delivery status.
Inventory Sub-Items	Simplify reporting and tracking by separating items into sub-categories such as size, color, and style. Associate separate cost and quality information with each sub-item.
Freight Costs	Automatically or manually allocate freight costs on sales orders, shipments, and invoices.
Matrix Items	Using templates, quickly create stock and non-stock items based on material, size, color, etc.

ABOUT ACUMATICA

Acumatica is the world's fastest growing provider of cloud ERP, with the industry's highest customer satisfaction rating trusted by companies across diverse industries. Acumatica is easy-to-use, full-featured and mobile software. With unlimited users, everyone can have a real-time view of your business anytime, anywhere.
